ESSENTIAL Li[®] REMOTE DISPLAY

If you're looking for a convenient way to monitor the state of charge of your electric vehicle, the Essential Li[®] Remote Display is the way to go. This easy to use display offers customers a better way to monitor the status of their lithium-ion batteries from the vehicle's dashboard. Estimating the state of charge (SOC) using voltage is unreliable when using Li-ion batteries—but with this device, you can be sure that you're getting the most accurate information about your battery pack in real time. No more having to manually check the LED indicators on your battery to get an idea of its charge—the Essential Li[®] Remote Display is here to make your life simpler and more efficient.

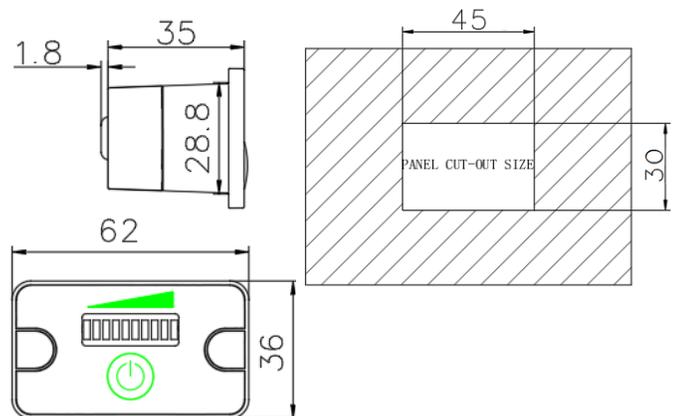

PART #	MSRMPDY
MATERIAL	70% ABS + 30% PC
WEIGHT	2LBS (0.9 KG)
COMPATABILITY	COMPATIBLE WITH ESSENTIAL LI [®] 24V AND 48V BATTERY MODELS.
CONNECTION	CAN BUS
